Portfolio
(+91)-991-892-7749

| Examination | University | Institute | Year | CPI/% |
|---|---|---|---|---|
| B.Tech (ET) | HBTU Kanpur | HBTU Kanpur | 2024 – Present | 7.0/10.0 |
| Diploma (IT) | BTEUP | Government Polytechnic, Lucknow | 2024 | 77.78% |
| Class XII | UP Board | Sri Sai Inter College | 2021 | 86.80% |

## Experience

**Dualite AI**
*Backend Intern* August 2025 – Present

- Scaled backend systems with cross-functional teams, contributing to product growth to **100K+ users**
- Delivered **5+ production-ready full-stack applications** with robust backend logic, APIs, and deployments
- Contributed to **Prompt Enhancer and Visual Editor**, improving manual user interaction efforts by **30%**
- Developed an automated bulk Tally voucher creation Automation by mapping Weighbridge ERP data to supplier-specific rates through an internal portal; moved a **10–20 day backlog to daily processing** and saved **30+ hours/week**.

**STC - Indian Railways, Lucknow**
*AI Research Intern* June 2025 – July 2025

- Built and deployed a **face recognition system** using computer vision integrated with a humanoid robot
- Improved model accuracy from **60–70% to 94%** via dataset enhancement and model optimization
- Enabled **real-time inference (sub-second latency)** through collaboration with robotics team

**SoftPro India, Lucknow**
*SDE Intern* July 2023 – September 2023

- Contributed to an **e-learning platform** serving **30,000+ users**
- Delivered **scalable, production-ready features** with cross-functional teams

## Skills

- **Languages:** C, C++, Python, Javascript, SQL
- **Framework and Libraries :** Django, Tkinter, Bootstrap, Tailwind CSS, React.js, Node.js, Hono.js, OpenCV, YOLO
- **Databases & Automations :** MySQL, PostgreSQL, SQLite3, MongoDB, Supabase, Workflow Automation, n8n, MCP, AI Agents, API Integration, OCR, Gemini, Prompt Engineering
- **Dev Tools and Utilities :** Git, GitHub, Notion, Figma, Postman, Docker, Jira.

## Relevant Certifications & Positions

- **Lead**, Google Developers Group On Campus (GDGoC), HBTU Kanpur Chapter.
- **Technical Team**, NSS HBTU Kanpur, AETE HBTU Kanpur.
- Completed **100 Hours Course on Cyber Security and Digital Forensics**, IIIT Kota.
- Completed **Course on Computer Concepts**, National Institute of Electronics and Information Technology (NIELIT).

## Projects

**Tally Bookkeeping Automation** [Link]
*Python, Tally, Excel, ERP Data Integration, Workflow Automation*

- Engineered an end-to-end **Tally Voucher Automation System** integrating a web dashboard, browser extension, and intranet-based Weighbridge & ERP, enabling centralized supplier-rate management, configurable voucher processing, and real-time posting-status with automated emails.
- Automated **ERP data extraction and supplier-specific rate mapping**, retrieving truck/receipt details and matching item rates to prepare accurate, bulk-ready accounting vouchers.
- Reduced an estimated **10–20-day processing backlog to daily processing** and saved **30+ hours per week** by automating voucher preparation, data mapping, and repetitive entry workflows.

**ASHA AI – Voice-First Rural Health Companion** [Link]
*FastAPI, React, Supabase Auth, NeonDB, Google Cloud, AI Agents, Whisper, Mistral & Vertex AI API*

- Developed a **multilingual voice-first AI assistant** enabling rural users to access healthcare via WhatsApp and mobile apps
- Built a **speech-to-intent pipeline** using Whisper and fine-tuned LLMs to interpret regional dialect inputs
- Implemented **voice-based tracking, nutrition planning, and risk detection** for maternal and adolescent health & automated logging, summaries, and high-risk case detection for **ASHA workers**

**Pulse AI – Clinical Surveillance System** [Link]
*FastAPI, React, Supabase Auth, NeonDB, TimescaleDB. Google Cloud, AI Agents, Vertex AI*

- Built an **event-driven health monitoring system** for early risk detection on **CareScore (0–100)** engine via time-series analysis & is integrated with Google Fit & Smart Watches
- Developed **data ingestion pipelines** using Google OAuth + Drive API (ZIP → SQLite → structured data)
- Implemented **multi-role system** (Patient, Doctor, Caretaker) with RBAC and **real-time dashboards** for updates & alerts

**AI Job Hunting Automation Agent** [Link]
*Agentic AI + Automation*

- Built an **AI-driven job pipeline** scraping platforms and ranking jobs based on resume fit
- Delivered structured outputs every 6 hrs via n8n to Google Sheets with **email alerts**, saving 10+ hrs/week

**AI-Powered Targeted Commenting Agent** [Link]
*Agentic AI + Backend*

- Built a **human-in-the-loop agentic system** for targeted social media engagement across platforms
- Implemented **LLM + platform adapters** with a context-aware prompt pipeline for consistent outputs
- Developed **feedback loop + compliance layer** to improve generations and ensure brand safety

## Miscellaneous Achievements

- **8x Hackathon Winner**, Won **Square Hacks Finals (IIT Delhi)** among **600+ teams nationwide** with Rs. 40,000 cash prize
- Won **Best AI Innovative Use Case** at GenAI Hackathon Finals among **85+ teams** (AI Community Lucknow & TFUG)
- **Runner-up, TechX Hackathon** (Rs. 10,000) for building a cybersecurity solution for **Cyber Police Lucknow**
- **Smart India Hackathon (SIH) Internal Qualifier** among **100+ teams** across institute-level selection
- Organized hackathons and tech events under **GDG HBTU & AETE**, engaging **500+ students** from multiple colleges
- Mentored students in **Web Development, AI/ML, and emerging technologies** across technical communities
